

# ASSOCIATED ENGINEERING CONSULTANTS, INC.

## Mission Statement

AEC is a team of professionals who are experienced, knowledgeable, productive and innovative. AEC provides effective engineering solutions, services and products to clients in an efficient and economical manner. This is accomplished through detailed planning and strict adherence to the fundamental principles of integrity, cooperation and personal development.

## Across the Nation

Associated Engineering Consultants, Inc. (AEC) is a diverse civil engineering consulting firm specializing in urban and municipal site development, pavement engineering, pavement management planning, materials engineering, construction management, quality control / quality assurance, material testing and surveying.

The engineers and project managers at AEC offer not only their multifaceted capabilities and expertise for a successful and cost effective project, but the necessary experience, facilities, and resources to handle projects of any size.

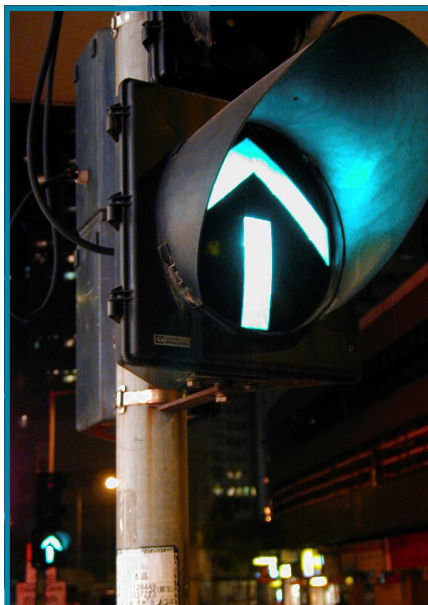

AEC is committed to the highest standards of engineering excellence and has a true interest in providing clients with superior solutions in a timely and cost effective manner.

The cornerstone to AEC's success is now, and always will be effective communications from a project's inception through completion and client acceptance.

Established in 1998, AEC has gained an excellent reputation in consulting and testing throughout the Nation.

## Corporate Philosophy

AEC's Corporate Philosophy is to function as an extension of our client's staff, to manage projects on the client's behalf and to operate as though the project was our own. This enables AEC to represent clients without a conflict of interest. AEC staff includes project engineers, construction managers, civil, mechanical and petroleum engineers, as well as land planners, surveyors, drafting technicians, material testing technicians, information technology professionals and construction inspectors.

Corporate Philosophy
